

Simon Jennings

An ERA-NET supported by the
6th Framework Programme

Strengthening the links between European marine fisheries science
and fisheries management

Bycatch Discards

- **Gear Technology**
- **Acceptable levels**
- **Incentives for fishermen**
- **Real time closures**

Habitat maps

- Methods for developing maps
- Impact assessments

Trade offs

- Multiple species – effects

Ecosystem based Management

- Marina – links
- Sociological analysis of decision making process
- Climate aspects
 - stock assessments
 - multiple species models
- Contaminants
 - effects on fish populations
 - food webs
 - climate interaction
- Behavioural responses of fishermen
- Impact assessments and footprint analysis
